LIBERTY NETWORKS

THE CONNECTED SCHOOL

The right partner can help you integrate your entire application stack to deliver better experiences to students, parents, and teachers, as well as improving the bottom line of your educational institution.

FOR TEACHERS AND SCHOOLS

6 LEARNING MANAGEMENT

Private Cloud. Having a Learning Management System hosted in the cloud allows easy access to learning resources for both students and teachers, in a scalable, safe, and reliable way.

7 MANAGEMENT

Infrastructure as a Service. Admission, registration, and student enrollment processes are supported by applications hosted on the cloud. When combined with security and connectivity, institutions get the added benefits high availability, savings and simplified management.

8 COLLABORATIVE CONTENT DEVELOPMENT

Collaboration and Cloud Services. Teachers collaborate with colleagues from other educational institutions, share information and best practices to improve overall content, for both remote and face-to-face learners.

FOR PARENTS AND STUDENTS

1 APPLICATION SECURITY

All of your educational center's applications, even those that are not hosted in the cloud, need to be protected.

2 INSTITUTIONAL COMMUNICATION

The entire educational community can stay up to date with campus activity at any time, thanks to digital signage solutions.

3 TECHNOLOGY IN THE CLASSROOM

WI-FI Networks. Students rely on technology for their own learning processes. They use Wi-Fi to reliably connect their devices and are supported by smart monitors for a truly interactive learning experience.

4 REMOTE LEARNING

Web Conferencing. Distance learners seamlessly coexist with students physically present, for a completely integrated learning experience.

5 BEYOND THE CLASSROOM

Omni-channel Communication. The educational community has multiple options for communication and collaboration, wherever they are and with any device, through calls, chat, and video.
